Art Unit: 1651

1. Claims 1-17 are present in this instant application.
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11, drawn to a process for the production of high purity crystals of phyhydroxy cyclic carboxylic acids, classified in numerous classes depending upon the compound, numerous subclasses depending upon the compound per se-broad claim cannot be properly searched and examined based on the language.
 - II. Claim 12, drawn to a high purity PCCA, classified in numerous classes and subclasses-claim cannot be properly classified as well as examined commensurate in scope with the claimed language.
 - III. Claims 13-15, drawn to a process for the isolation of PCCA crystals from fermentation products, classified in Class 560, subclass 126.
 - IV. Claims 16-17, drawn to a process for the fermentation of a microorganism to form shikimic acid which is further processed to form high purity crystals of shikimic acid, classified in Class 435, subclass 127.

Art Unit: 1651

3. The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process of making the product e.g., by organic synthesis.

Inventions III does not require the specifics of Invention IV.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, have acquired a separate status in the art because of their recognized divergent subject matter and the search required for one invention is not required for the other invention, thusly the restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1651

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
